*Diese Publikation ist eine Vollzugshilfe des BUWAL als Aufsichtsbehörde und richtet sich primär an die Vollzugsbehörden aber auch an direkt betroffene Dritte. Sie konkretisiert unbestimmte Rechtsbegriffe von Gesetzen und Verordnungen und soll eine einheitliche Vollzugspraxis ermöglichen. Das BUWAL veröffentlicht solche Vollzugshilfen (oft auch als Richtlinien, Wegleitungen, Empfehlungen, Handbücher, Praxishilfen u.ä. bezeichnet) in seiner Reihe «Vollzug Umwelt».*

*Die Vollzugshilfen gewährleisten einerseits ein grosses Mass an Rechtsgleichheit und Rechtssicherheit; andererseits ermöglichen sie im Einzelfall flexible und angepasste Lösungen. Berücksichtigen die Vollzugsbehörden diese Vollzugshilfen, so können sie davon ausgehen, dass sie das Bundesrecht rechtskonform vollziehen. Andere Lösungen sind nicht ausgeschlossen; gemäss Gerichtspraxis muss jedoch nachgewiesen werden, dass sie rechtskonform sind.*

# 1. Einleitung

## Vorbemerkung

Mit dem Erlass der Verordnung über den Umgang mit Organismen in geschlossenen Systemen (Einschliessungsverordnung, ESV) hat der Bundesrat das Bundesamt für Umwelt, Wald und Landschaft (BUWAL) beauftragt, Listen der zugeordneten Organismen und der biologischen Sicherheitssysteme zu führen (Art. 22 ESV). Mit diesen Listen soll der Vollzug der Einschliessungsverordnung und der mit dieser verknüpften Verordnung über den Schutz der Arbeitnehmerinnen und Arbeitnehmer vor Gefährdung durch Mikroorganismen (SAMV) erleichtert und harmonisiert werden.

Die Listen sind vom BUWAL dem Bundesamt für Gesundheit (BAG), dem Bundesamt für Veterinärwesen (BVET), dem Bundesamt für Landwirtschaft (BLW), dem Staatssekretariat für Wirtschaft (seco), der Schweiz. Unfallversicherungsanstalt (SUVA), der Eidg. Fachkommission für biologische Sicherheit und der ERFA Bio (Arbeitsgruppe der Vollzugsstellen der Kantone) zur Stellungnahme unterbreitet worden. Die vorliegende Veröffentlichung dieser Liste durch das BUWAL erfolgt im Einvernehmen mit allen beteiligten Bundesstellen.

## **Anmerkungen zur Pilzliste**

In der vorliegenden Liste sind mikroskopisch kleine, für Mensch und Tier pathogene Pilze sowie phytopathogene Pilze aufgeführt. Diese Liste ist bei weitem nicht abschliessend für alle pathogenen Pilze. Sie stellt aber eine gute Auswahl der pathogenen Pilze dar, die für die Schweiz von Belang sind. Ebenfalls enthalten sind besonders gefährliche Schadorganismen, unabhängig davon, ob sie in der Schweiz vorkommen oder nicht. Es wird der gegenwärtig gebräuchlichste Name verwendet. Zusätzlich werden die gängigen Synonyme aufgeführt, ebenso wie die Haupt- oder Nebenfruchtform. Teilweise werden je nach Land oder persönlichen Vorlieben unterschiedliche Begriffe verwendet. Auf Grund neuer Erkenntnisse zur Taxonomie oder in Folge von Änderungen der Anhänge 1 und 2 der Pflanzenschutzverordnung (PSV, SR 916.20) können sich für die Liste Änderungen ergeben. Die Anwenderinnen und Anwender der Liste werden gebeten, solche Informationen zu melden.

Die Einstufung der Pilze in eine Gruppe bestimmt in starkem Ausmass die Sicherheitsstufe, auf der Tätigkeiten mit ihnen durchgeführt werden müssen. Erst eine detaillierte Risikobewertung gemäss Art. 8 ESV kann jedoch abschliessend Auskunft geben, ob die erforderliche Sicherheitsstufe mit der Gruppe des Organismus identisch ist oder ob allenfalls ein höheres Sicherheitsniveau nötig ist. Der Umgang mit grossen Mengen von Organismen, die mögliche Entstehung von Aerosolen oder der Gebrauch scharfer oder spitzer Instrumente ("Sharps") sind wichtige Elemente, die im Rahmen einer Risikobewertung und bei der Bestimmung der notwendigen Sicherheitsmassnahmen zu beachten sind.

Nicht alle in der Liste aufgeführten Pilze konnten einer Gruppe zugeteilt werden. Es wurde entschieden, sie trotzdem in der Liste zu belassen. Vor Beginn allfälliger Arbeiten mit diesen Organismen ist eine Einstufung im Rahmen der Risikobewertung gemäss Art. 8 ESV vorzunehmen.

## Legende

**Anamorph:** asexuelle Nebenfruchtform.

**Teleomorph:** Hauptfruchtform mit sexueller Fortpflanzung.

### Für Mensch und Tier pathogene Pilze

- h** In der Literatur belegte pathogene Wirkung auf den Menschen, einschliesslich Personen mit Immunschwäche. Die Arten werden grundsätzlich den Gruppen 2 und 3 zugeordnet.
- v** In der Literatur belegte pathogene Wirkung auf Wirbeltiere (Säugetiere ohne Mensch, Vögel, Fische, Reptilien und Amphibien). Die Arten werden grundsätzlich den Gruppen 2 und 3 zugeordnet.
- n** Pathogene Wirkung auf Wirbellose. Diese Arten werden den Gruppen 2 und 3 zugeordnet.
- X** Noch nicht eingestuft.  
Vor Beginn einer Arbeit mit diesen Organismen ist eine Einstufung im Rahmen der Risikobewertung gemäss Art. 8 ESV vorzunehmen. Die zuständige Bundesbehörde ist zu kontaktieren.
- TA** Arten, von denen Stämme seit langem ohne erkennbares Risiko für technische Anwendungen zum Einsatz kommen. Entsprechend den Kriterien zur Einstufung können diese Stämme somit der Gruppe 1 zugeteilt werden.

### Phytopathogene Pilze

- p** Phytopathogene Arten.  
Um eine mit der Einschliessungsverordnung (ESV) konforme Einstufung vornehmen zu können, müssen Herkunft und Ursprung der Stämme bekannt sein. In der vorliegenden Liste sind die meisten phytopathogenen Pilze der Gruppe 1 zugeordnet. Wenn bestimmte Stämme jedoch ein gewisses Risikopotenzial haben, sind sie der Gruppe 2 zuzuordnen. Dies gilt insbesondere für Stämme aussereuropäischer Herkunft, die zu einer Art gehören, welche in der Schweiz als zu bekämpfende Erreger einer Pflanzenkrankheit gelten ([http://www.blw.admin.ch/pflanzenschutzverz/pb\\_home\\_d.html](http://www.blw.admin.ch/pflanzenschutzverz/pb_home_d.html)), sowie für aggressive oder fungizidresistente Stämme oder Stämme mit unzureichend charakterisierten oder bekannten Eigenschaften. Für die Einfuhr von phytopathogenen Pilzen ist eine Bewilligung des Bundesamts für Landwirtschaft (BLW) erforderlich.
  - a)** Gemäss PSV, SR 916.20, **Anhang 1, Teil A:** Besonders gefährliche Schadorganismen, deren Einschleppung und Ausbreitung in der ganzen Schweiz verboten ist ([http://www.admin.ch/ch/d/sr/916\\_20/app1.html](http://www.admin.ch/ch/d/sr/916_20/app1.html)). **Abschnitt I:** Besonders gefährliche Schadorganismen, deren Auftreten nirgends in der Schweiz festgestellt wurde und die für die ganze Schweiz von Belang sind, **c) Pilze.**
  - b)** Gemäss PSV, SR 916.20, **Anhang 1, Teil A:** Besonders gefährliche Schadorganismen, deren Einschleppung und Ausbreitung in der ganzen Schweiz verboten ist ([http://www.admin.ch/ch/d/sr/916\\_20/app1.html](http://www.admin.ch/ch/d/sr/916_20/app1.html)). **Abschnitt II:** Besonders gefährliche Schadorganismen, deren Auftreten in der Schweiz festgestellt wurde und die für die ganze Schweiz von Belang sind, **c) Pilze.**
  - c)** Gemäss PSV, SR 916.20, **Anhang 2, Teil A:** Besonders gefährliche Schadorganismen, deren Einschleppung und Ausbreitung in der ganzen Schweiz bei Befall bestimmter Waren verboten ist ([http://www.admin.ch/ch/d/sr/916\\_20/app2.html](http://www.admin.ch/ch/d/sr/916_20/app2.html)). **Abschnitt I:** Besonders gefährliche Schadorganismen, deren Auftreten nirgends in der Schweiz festgestellt wurde und die für die ganze Schweiz von Belang sind, **c) Pilze.**

**d)** Gemäss PSV, SR 916.20, **Anhang 2, Teil A:** Besonders gefährliche Schadorganismen, deren Einschleppung und Ausbreitung in der ganzen Schweiz bei Befall bestimmter Waren verboten ist ([http://www.admin.ch/ch/d/sr/916\\_20/app2.html](http://www.admin.ch/ch/d/sr/916_20/app2.html)). **Abschnitt II:** Besonders gefährliche Schadorganismen, deren Auftreten in der Schweiz festgestellt wurde und die für die ganze Schweiz von Belang sind, **c) Pilze.**

**e)** Aufgeführt in der EPPO A1 List (<http://www.eppo.org/QUARANTINE/lists.htm>), nicht aber in der PSV, SR 916.20, Anhänge 1 und 2.

**f)** Aufgeführt in der EPPO A2 List (<http://www.eppo.org/QUARANTINE/lists.htm>), nicht aber in der PSV, SR 916.20, Anhänge 1 und 2.

**g)** Aufgeführt in der EPPO Alert List ([http://www.eppo.org/QUARANTINE/Alert\\_List/alert\\_list.htm](http://www.eppo.org/QUARANTINE/Alert_List/alert_list.htm)).

**X** Noch nicht eingestuft.

Vor Beginn einer Arbeit mit diesen Organismen ist eine Einstufung im Rahmen der Risikobewertung gemäss Art. 8 ESV vorzunehmen. Die zuständige Bundesbehörde ist zu kontaktieren.

**TA** Arten, von denen Stämme seit langem ohne erkennbares Risiko für technische Anwendungen zum Einsatz kommen. Entsprechend den Kriterien zur Einstufung können diese Stämme somit der Gruppe 1 zugeteilt werden.
